Program

Fourth International Conference on Porous Media and its Applications in Science, Engineering and Industry

June 17-22, 2012
Potsdam, Germany

Chair
Kambiz Vafai
University of California, Riverside, USA

Co-Chairs
Adrian Bejan
Duke University, USA

Akira Nakayama
Shizuoka University, Japan
Seminaris Seehotel Potsdam
An der Pirschneide 40
D-14471 Potsdam
Germany
Tel: +49 (0) 331 9090-0
Fax: +49 (0) 331 9090-900
Engineering Conferences International (ECI) is a not-for-profit global engineering conferences program, originally established in 1962, that provides opportunities for the exploration of problems and issues of concern to engineers and scientists from many disciplines.

ECI BOARD MEMBERS

Barry C. Buckland, President
Peter Gray
Michael King
Raymond McCabe
David Robinson
William Sachs
Eugene Schaefer
P. Somasundaran
Deborah Wiley

Chair of ECI Conferences Committee: William Sachs
ECI Technical Liaison for this conference: Frank Schmidt

ECI Director: Barbara K. Hickernell
ECI Associate Director: Kevin M. Korpics

©Engineering Conferences International
International Organizing Committee

Prof. Antonio Barletta (Università di Bologna, Italy),
Prof. Jacob Bear (Technion, Israel),
Prof. Adrian Bejan (Duke University, USA),
Prof. Faruk Civan (University of Oklahoma, USA),
Dr. Fabien Frizon (CEA Marcoule, France),
Dr. Robin Gerlach (Montana State University, USA),
Prof. S. Majid Hassanizadeh (Utrecht University, Netherlands),
Prof. Reiner Helmig (Universitaet Stuttgart, Germany),
Prof. Rudolf Hilfer (Universitaet Stuttgart, Germany),
Prof. Massoud Kaviany (University of Michigan, USA),
Prof. Arzhang Khalili (Max Planck Institute for Marine Microbiology, Germany),
Prof. Andrey Kuznetsov (North Carolina State University, USA),
Louis-Philippe Lefebvre (National Research Council, Canada),
Dr. Marcelo J. S. de Lemos (Instituto Tecnologico de Aeronautica, Brazil),
Dr. Sylvie Lorente (INSA, France),
Prof. Oronzio Manca (Seconda Universita' delgi Studi di Napoli, Italy),
Prof. Jacob H. Masliyah (University of Alberta, Canada),
Prof. Robert McKibbin (Massey University at Albany, New Zealand),
Prof. A. F. Miguel (University of Evora, Portugal),
Prof. W. J. Minkowycz (University of Illinois at Chicago, USA),
Prof. Abdulmajeed A. Mohamad (Alfaisal University, Saudi Arabia),
Prof. Kader Mojtabi (Universite Paul Sabatier, France),
Prof. Akira Nakayama (Shizuoka University, Japan),
Prof. Dimos Poulikakos (ETH, Switzerland),
Dr. D.A.S. Rees (University of Bath, England),
Prof. A. Heitor Reis (University of Évora, Portugal),
Prof. N. Rudraiah (Bangalore University, India),
Prof. Phadungsak Rattanadecho (Thammasat University, Thailand),
Prof. Manolis Tomadakis (Florida Institute of Technology, USA),
Dr. Marc Prat (Institut de Mecanique des Fluides de Toulouse, France),
Dr. Michel Quintard (Institut de Mecanique des Fluides de Toulouse, France)
The conference gratefully acknowledges support from the U.S. National Science Foundation
Sunday, June 17, 2012

16:30 – 18:00  Registration
18:00 – 19:00  Reception
19:00 – 20:30  Dinner
20:30 – 21:30  Opening Keynote Talk
   Porous Media in the Oilfield
   Peter Tilke, Schlumberger-Doll Research, USA

Notes

- Meals will be in the Restaurant “Templiners” (with exception of banquet-location to be announced)
- Taping and photography of any presentations are prohibited.
- Speakers – Please leave at least 5 minutes for questions and discussion.
- Please do not smoke at any conference functions.
- Turn your cellular telephones to vibrate or off during technical sessions.
- Please write your name on your program so that it can be returned to you if lost.
- After the conference, ECI will send an updated participant list to all participants. Please check your listing now and if it needs updating, you may correct it at any time by logging into your ECI account.
Monday, June 18, 2012

07:00 – 08:00  Breakfast

08:00 – 08:50  
**Keynote – Processing and properties of porous composite metal foams**  
Afsaneh Rabiei, North Carolina State University, USA

**Oral Session 1: Transport through Porous Media (I)**

08:50 - 09:15  
**Fluid flow and solute transport in unevenly-stratified groundwater aquifers**  
Robert McKibbin, Massey University at Albany, New Zealand

09:15 - 09:40  
**How to calculate hydraulic tortuosity easily?**  
Maciej Matyka, University of Wroclaw, Poland

09:40 – 10:05  
**Fluid flow and aerosol transport in T-shaped 3D structures**  
Ana Serrenho, Evora Geophysics Centre, Portugal

10:05 – 10:35  Coffee break

10:35 – 11:00  
**Coupling mass transport in inner and outer flows while modeling drying from a pore-network model**  
Krishna M. Pillai, University of Wisconsin-Milwaukee, USA

11:00 – 11:25  
**A new experimental technique to study the flow in a porous layer via rheological tests**  
Claudia Carotenuto, Second University of Naples, Italy

**Oral Session 2: Porous Media Characteristics (I)**

11:25 – 11:50  
**Pore-scale modeling of the impacts of geochemical transformations on flow**  
Sumit Mukhopadhyay, Lawrence Berkeley National Laboratory, USA

11:50 – 12:15  
**Channel segregation during columnar solidification influence of inertia**  
Dominique Gobin, CNRD-EM2C-Ecole Centrale Paris, France

12:15 – 12:40  
**The flow around circular cylinders partially coated with porous media**  
Bodo Ruck, Karlsruhe Institute of Technology (KIT), Germany

12:45 – 14:00  Lunch
### Concurrent - Oral Session 3: Porous Media in Biological and Environmental Applications

14:00 – 14:25  | Porous media for catalytic renewable energy conversion  
| Nico Hotz, Duke University, USA  

14:25 – 14:50  | Interaction of gusts with forest edges  
| Bodo Ruck, Karlsruhe Institute of Technology (KIT), Germany  

14:50 – 15:15  | Toward a porous media model of the human lung  
| Christopher T. DeGroot, University of Western Ontario, Canada  

### Concurrent - Oral Session 4: Nano and Micro Scale Phenomena

14:00 – 14:25  | 3D porous media reconstruction using a simulated annealing technique  
| Alysson Nunes Diógenes, Universidade Federal do Paraná, Brazil  

14:25 – 14:50  | Unsteady magnetohydrodynamic flow of a micropolar fluid due to constant accelerated disk with no slip conditions in a porous medium  
| Faisal Shahzad, National University of Sciences and Technology CAE Campus, Pakistan  

14:50 – 15:15  | Soret Dufour effect on the stability of a micropolar fluid in a porous medium  
| Jaimala Bishnoi, Ch. Charan Singh University, India  

15:15 – 15:40  | Laws of non-symmetric optimal flow structures, from the macro to the micro-scale  
| Heitor Reis, University of Évora, Portugal  

15:40 – 16:05  | Moderate Reynolds number flow through a microchannel filled with an array of micro-cylinders  
| Kamel Hooman, University of Queensland, Australia  

16:05 – 19:30  | *ad hoc* sessions / free time

19:30 – 21:00  | Dinner

21:00 – 22:30  | Poster Sessions (with wine and beer)
Tuesday, June 19, 2012

07:00 – 08:00  Breakfast

08:00 – 08:50  Keynote Talk – Residual saturation dynamics and hysteresis in porous media
Rudolf Hilfer, University of Stuttgart, Germany

Oral Session 5: Experimental and Measurement Techniques

08:50 – 09:15  Experimental investigation of drying by pore networks: Influence of pore size distribution and temperature
Nicole Vorhauer, Otto von Guericke University Magdeburg, Germany

09:15 – 09:40  Measurements on the flow of vapors near saturation through porous Vycor glass membranes
Thomas Loimer, Technical University of Vienna, Austria

09:40 – 10:05  Imaging, microanalysis and modeling of the microbially induced CaCO3 precipitation process
James Connolly, Montana State University, USA

10:05 – 10:35 Coffee break

Oral Session 6: Industrial and Environmental Flow and Heat Transfer in Porous Media (I)

10:35 – 11:00  Numerical modeling of ground-water flow and contaminant transport in a saturated porous medium
Mohammad Sadegh Valipour, Semnan University, Iran

11:00 – 11:25  Turbulent heat transfer analysis of silicon carbide ceramic foam as a solar volumetric receiver
Akira Nakayama, Shizuoka University, Japan

11:25 – 11:50  Macroscopic turbulent models for heat transfer in catalyst packed beds
Fabrice Mathey, Air Liquid, France

11:50 – 12:15  Local heat transfer coefficients and bed porosity between a horizontal cylinder and bubbling fluidized bed of Gerdart B materials
Francesco Di Natale, University of Naples, Italy

12:15 – 13:30 Lunch
Tuesday, June 19, 2010 (continued)

**Concurrent Oral Session 7: Multiphase Transport in Porous Media**

13:30 – 13:55  
A novel numerical approach for the solution the problem of two-phase, immiscible flow in porous media using shifting matrix technique  
Amgad Salama, King Abdullah University of Science and Technology, Saudi Arabia

13:55 – 14:20  
Computational modeling technique for numerical simulation of immiscible two-phase flow problems involving flow and transport phenomena in porous media with hysteresis  
Eduardo Abreu, Universidade Estadual de Campinas (UNICAMP), Brazil

14:20 – 14:45  
**Hyperslow drainage**  
Marc Prat, Institut de Mécanique des Fluides de Toulouse, France

**Concurrent Oral Session 8: Oil Reservoirs and Geophysics**

13:30 – 13:55  
Theoretical fundamentals, critical issues, and adequate formulation of effective shale gas and condensate reservoir simulation  
Faruk Civan, University of Oklahoma, USA.

13:55 – 14:20  
A multicore numerical framework for assessing the permeability of reservoir rocks  
Peter G. Tilke, Schlumberger-Doll Research Center, USA

14:20 – 14:45  
Modern hardware architectures accelerate porous media flow computations  
Michal Kulczewski, Poznan Supercomputing and Networking Center, Poland

14:45 – 19:30  
ad hoc sessions / free time

19:30 – 21:00  
Dinner

21:00 – 22:30  
**Poster Sessions** (with wine and beer)
**Wednesday June 20, 2012**

<tbody>
<tr>
<td>07:00 – 08:00</td>
<td>Breakfast</td>
</tr>
</tbody>
</table>
| 08:00 – 08:50 | **Keynote Talk – Controlling chaos in porous media convection by using feedback control**  
Peter Vadasz, Northern Arizona University, USA |
|               | **Oral Session 9: Convection In Porous Media**                        |
| 08:50 – 09:15 | **Natural convection of miscible two phases due to density difference in saturated porous media**  
Tetsuya Suekane, University of Tokushima, Japan |
| 09:15 – 09:40 | **Double diffusive convection due to a horizontal wavy surface in a porous medium**  
Mahesha Narayana, University of KwaZulu-Natal, South Africa |
| 09:40 – 10:05 | **Analysis and experiment for Darcy flow convection in cylindrical metal foram**  
Nihad Dukhan, University of Detroit Mercy, USA |
| 10:05 – 10:35 | Coffee break                                                          |
|               | **Oral Session 10: Advances In Numerical Techniques**                 |
| 10:35 – 11:00 | **A finite volume method for the solution of fluid flows coupled with the mechanical behavior of compacting porous media**  
Clovis R. Maliska, Federal University of Santa Catarina, Brazil |
| 11:00 – 11:25 | **Lattice Boltzmann method for modeling heat and mass transfer during drying of deformable porous medium**  
Hussein El Abrach, Monastir National Engineering School, Tunisia |
| 11:25 - 11:50 | **Laminar slot-jet impinging on confined porous medium in local thermal non-equilibrium conditions with bottom surface at uniform heat flux**  
Oronzio Manca, Università degli Studi di Napoli, Italy |
| 11:50 – 12:15 | **A finite difference, multi-point flux numerical approach to flow problems in porous media: numerical examples**  
Amgad Salama, King Abdullah University of Science and Technology, Saudi Arabia |
| 12:15 – 13:30 | Lunch                                                                |
**Wednesday June 20, 2012 (continued)**

### Concurrent Oral Session 11: Biotransport In Porous Medium (I)

<table>

</table>

15:50  **Optional Excursion**

20:00  **Dinner**
**Thursday June 21, 2012**

07:00 – 08:00  Breakfast

**Oral Session 13: Biotransport in Porous Medium (II)**

08:00 - 08:25  Development of active porous medium filters based on plasma textiles  
A.V. Kuznetsov, North Carolina State University, USA

08:25 - 08:50  Adsorption of iaminaribiose in an *in situ* product recovery process  
Thomas Waluga, Technische Universität Braunschweig, Germany

08:50 - 09:15  Sap flow and heat transport in trees  
John M. Stockie, Simon Fraser University, Canada

09:15 - 09:40  Biofilm-mediated mineral precipitation – applications in geologic carbon sequestration and beyond  
Robin Gerlach, Montana State University, USA

09:40 - 10:05  Effect of steady streaming on the flow of micropolar fluid through a constricted annulus in the presence of catheter  
D Srikanth, Defense Institute of Advanced Technology, India

10:05 – 10:35  Coffee break

**Oral Session 14: Metal Foam Heat Exchangers and Industrial and Environmental Flow and Heat Transfer in Porous Media**

10:35 – 11:00  Fluid flow and heat transfer in inclined heat exchanger bundles  
Kamel Hooman, University of Queensland, Australia

11:00 – 11:25  Material and height effects on the heat transfer performance of metal foams cooled by air in forced convection  
Simone Mancin, University of Padova, Italy

11:25 – 11:50  Metal foam heat exchangers for heat transfer augmentation from fuel cell systems  
Mostafa Odabaee, University of Queensland, Australia

12:00 – 13:30  Lunch
Thursday June 21, 2012 (continued)

**Concurrent Oral Session 15: Industrial Applications of Porous Media**

13:30 – 13:55  Diesel spray interaction with highly porous structures for supporting of liquid distribution in space and its vaporization
Miroslaw Weclas., Georg-Simon-Ohm-University of Applied Sciences, Nuremberg, Germany

13:55 – 14:20  Unconventional gas resources in the U.S.
Shapour Vossoughi, University of Kansas, USA

14:20 – 14:45  Air cooling using a matrix of ceramic tubes
Mohamed Ali, King Saud University, Saudi Arabia

**Concurrent Oral Session 16: Porous Media Characteristics (II)**

13:30 – 13:55  Experimental and numerical investigation of flow through a porous medium downstream of a sharp bend
Emma Kelly, University of Limerick, Ireland

13:55 – 14:20  A numerical determination of gel permeability on the pore-scale
Marc-Florian Uth, Hamburg University of Technology, Germany

14:20 – 14:45  Tomographic immersed boundary method for permeability prediction of realistic porous media
D.J. Lopez Penha, University of Twente, The Netherlands

14:45 – 15:10  A geometric pore-scale model for predicting the permeability of 3D flow through fibrous porous media
Sonia Woudberg, Stellenbosch University, South Africa

15:10 – 15:35  Analysis of vortex flow through porous media
Fatemeh Hassanipour, University of Texas at Dallas, USA

16:00 – 20:00  *ad hoc* sessions / free time

20:00  Conference Banquet
Friday, June 22, 2012

07:00 – 08:00  Breakfast

Oral Session 17: Industrial Applications of Porous Media

08:00 - 08:25  Application of macro-cellular SiC reactor to diesel engine-like injection and combustion conditions
Miroslaw Weclas., Georg-Simon-Ohm-University of Applied Sciences
Nuremberg, Germany

08:25 – 08:50  Shale caprock integrity under carbon sequestration conditions
Mileva Radonjic, LSU, USA

08:50 – 09:15  Analysis and treatment of industrial wastewater through chemical coagulation – adsorption process: A case study of clariant Pakistan
Syed Farman Ali Shah, Mehran University of Engineering and Technology, Pakistan

09:15 – 09:40  Porous Vycor-glass for climate-regulation applications
Ferdinand Somorowsky, Fraunhofer ISC, Germany

09:40 – 10:10  Coffee break

10:10 – 12:15  Future directions / ad hoc discussions/ free time

12:15 – 13:30  Lunch and departures
